# THE DIRT MASTER

**Made in the USA, the Kwik-Way Dirt Master is the perfect backhoe for:**

- Digging footings
- Trenches
- Tearing out debris
- Digging waterways
- Power lines
- Spreading dirt and gravel
- Septic systems
- Small ponds
- Holes for trees
- Burying utilities
- Landscaping
- Cleaning ditches
- Small construction jobs
- Ripper tooth option for demolition

## **Easy to transport**

The versatile Dirt Master can be pulled using an ATV, lawn tractor or vehicle using the ball coupler hitch and safety chains included with every unit. The easy to transport Kwik-Way Dirt Master can be towed at speeds up to 45 mph.

Getting the compact Dirt Master into tight spaces is easy because the transport height is only 75 inches, the transport overhang is 38 inches, and the transport stabilizer spread is only 44 inches.

Safety pins lock the backhoe boom swing and the boom up to guard against accidental use as well as boom movement during transportation.

## **The Bucket**

Buckets can be ordered in 9", 12" and 16" sizes. The bucket teeth are made from hardened steel and are replaceable. The bucket rotates 147 degrees.

## **Rugged Steel Frame**

The box-beam steel frame construction offers uncommon durability for a towable backhoe.

## **Stabilizers Ensure Safe Operation**

The stabilizers extend to a wide stance, which provides stability and safe operation.

## **Easy to Adjust to Any Terrain**

The feet at the end of the stabilizers pivot so they match the contours of the ground providing safe operation when the ground is uneven.

## **Easy Accessibility**

The Dirt Master has easy on and easy off steps making it safe and easy for the operator to get on and off the machine.

## **Hydraulics**

Operating the Dirt Master is smooth and simple using the reliable hydraulic controls located at your fingertips. The four levers allow for

easy control of the boom, bucket, swing and crowd arm. Every Dirt Master has a self contained hydraulic reservoir and a replaceable hydraulic filtration system which ensures proper oil cooling and reduced temperatures which increases the life of the backhoe.

The Dirt Master gets the job done with a digging depth of 78 inches, a loading height of 65 inches and a reach of 100 inches and the boom swings a full 140 degrees.

## **Ripping Tooth Attachment**

The optional ripping tooth attachment is great for jobs such as taking out stumps and ripping up asphalt. The Ripping Tooth attachment is easy to put on and take off and goes in the same location as the bucket does.

## **Fender and Light Kit**

Heavy Steel frame fenders with lights and a 4 pin wire harness.

## MECHANICAL SPECIFICATIONS

Engine	Manual Start with low oil indicator light and shutdown
Max. HP	7.0 (5.1 KW)/ 4000 rpm.
Torque	10.26 ft. pds. (13.9 N.m.)/ 2500 rpm.
Fuel Capacity	.7 Gal (2.7 L)
Oil Capacity	1.3 pt. (0.60 L)
Tire Size	4.80/4.00-8 Pneumatic
Digging Depth	78"
Horizontal Reach	100"
Ripping Force	1,950 lbs.
Bucket Size	Chose from a 9", 12" or 16" bucket size
Max. Digging Radius	140 degrees
Lubrication	17 Grease Fittings at pivot points
Bucket Rotation	147 degrees
Tow Ball Size	2" Ball
Towing speed	45 mph. Max
Front Stabilizer Width	Down 117" ...Up (for transportation) 44"
Dry Weight	1,175 lbs.
Operation Weight	1,260 lbs.

## HYDRAULIC SPECIFICATIONS

Hydraulic Tank	12.46 gallon capacity
Hydraulic System	13.72 gallon capacity (including tank, cylinders, hoses, filter)
Hydraulic Fluid Filter	Spin-on type, 10 micron filter
Gear Pump	Single stage, 2.788 GPM
Hydraulic Fluid	Universal Hydraulic Fluid (all temps)

## SHIPPING SPECIFICATIONS

Shipping Dimensions	119" x 64" x 69 1/2"
Shipping Weight	1,175 lbs

Note: Specifications subject to change without notice.
